#### LA COUNTY CHOPRODS: INTERNAL THROTTLE ASSEMBLY

LA County Choprods have redesigned their Internal Throttle Assembly and now it is better than ever! This new unit now uses a "slide plunger" with two thread-in double ball bearing pin and bearing assemblies. In addition, the new aluminum "outer tube" has two spiral travel grooves and has been lengthened in order to close the inner end of the travel grooves. Finally, both the "outer tube" and the "slide plunger" are now hard anodized, all this provides for smoother operation and a longer life. For more information, call 310.353.2467 or visit [www.lachoprods.com](http://www.lachoprods.com).
