

New and Improved LA County Choprods Internal Throttle

Posted on May 12th, 2009 by Lisa Ballard

Made in the U.S.A. Gard Hollinger of LA County Choprods has redesigned his internal throttle assembly and now it is better then ever! This new unit now uses a "slide plunger" with two (2) thread-in double ball bearing pin and bearing assemblies.

In addition the new aluminum "outer tube" has two (2)

spiral travel grooves and has been lengthened in order to close the inner end of the travel grooves to eliminate the possibility of misshaping the tube when your handgrip set screws are tightened. Finally, both the "outer tube" and the "slide plunger" are now hard

anodized, all this provides for smoother operation and longer life. LACC's suggested retail price is \$185.00 making this the highest quality, lowest priced made in the U.S.A internal throttle assembly. For more information on this and other LA County Choprods parts visit www.lachoprods.com or telephone (310) 353-2467. Dealer inquiries invited. Also available through MC Advantages "Stampede" Brand
