Stevenson's Cycle Foot Controls

STEVENSON'S Cycle is now manufacturing its own range of fully customizable foot controls. The controls use steel in their construction and are offered in all black, all chrome, chrome and brass, black and brass, chrome and black, black and chrome and knurled or smooth brass toe pegs, with the

additional option of powder-coated finishes. Unlike other foot controls currently available, these ones have been designed to be compatible with regular handlebar grips. This move means that users can match the controls to those used on the bike's bars, or use rubber or Neoprene grips that can offer a level of vibration damping. Designed to fit four-speed frames and Softails up to '99, they can also be mounted to other models with an adaptor kit. A left side shifter or hydraulic foot clutch can be specified at the time of ordering.
